

# Network Computing DATA CENTRE

Network Computing's Data Centre is located in a secure facilities close to our offices near Maidstone in Kent, a significant distance from those in Central London which are increasingly vulnerable to threats from flooding and terrorism.

Our facility is manned and monitored 24-hours a day throughout the year, is ISO-27001 accredited, and is extensively covered by CCTV and patrols.

Connectivity is via multi-carrier diverse fibre networks linking to the London Metro Mesh and National backbone providing options for super-fast transfers and incredibly high resilience; ideal for Disaster Recovery contingencies.

Furthermore our Data Centre benefits from an extremely efficient award winning environmental cooling infrastructure incorporating a combination of free air / fresh air / chilled water cooling technology, utilising ambient temperature where possible to reduce the carbon footprint. Indeed even the extensive fire suppression system features Very Early Smoke Detection Alarm (VESDA) and an environmentally friendly natural Argon/Nitrogen mix that is also safe for people.

## CO-LOCATION

We also offer an affordable Co-Location option for our Clients who wish to locate their own rack-mounted hardware within our Data Centre.

Charges are based upon a combination of how much rack space the equipment requires, how much mains power is needed, and what sustained speed of connection and data throughput will be utilised.

The monthly billing is flexible based upon utilisation which is particularly relevant for Disaster Recovery (DR) facilities where connection speed and throughput may be low until used to cover a DR event.

## Disaster Recovery Suite

For Clients with CentraCloud Hosting or Co-located equipment we offer the opportunity of a relatively low cost Disaster Recovery Suite for occupation should an event or circumstance affect access to their own office facilities.

Ideal for around twelve key members of their DR team, this dedicated DR facility adjacent to our Data Centre has ample free on-site parking, is within easy distance of the M20 motorway and Maidstone East Station only 1 hour from London-Victoria, is equipped for immediate occupation with desks and chairs, has the use of the on-site Canteen, and is in close proximity to a wide choice of hotels.
